 Browse on Web

NEXCONEC® 1U 24 ports angled unloaded keystone patch panel allows flexibility for the users during installations. It gives you the benefits of only using ports required by installing the desired number of jacks into the frame. With the front angular design, this panel will help the cable routed to left and right separately by increasing the cable bending radius.

With the silkscreen printed port identification number which help the end user to recognize the ports while/after installation. When mounted with NEXCONEC keystone jacks for Cat 5E, Cat 6 and Cat 6A, your completed panel will conform to **ANSI/TIA/EIA 568A-B.2.2001**, **ISO/IEC11801:2002** and **EN50173-2** standards.

This angled keystone jack patch panel comes with cable ties, cage nuts and rear cable management bar as standard.

FEATURES

- ✓ Angled design for better cable routing
- ✓ Compatible with all NEXCONEC UTP keystone jacks
- ✓ 19" rack mountable
- ✓ Support up to 24port in 1U height
- ✓ Supplied with rear cable managers and fixings
